

Table of Contents

Introduction

Bishop, I.:

Visualization for Participation: The Advantages of Real-Time?

Lange, E.:

Issues and Questions for Research in Communicating with the Public through Visualizations

Lennertz, B.:

The Charrette as an Agent for Change

Selle, K.:

The End of Public Participation? Stories of the Transformation of an Old Notion

Integrated Landscape Visualization Systems

Werner, A., O. Deussen, J. Döllner, H.C. Hege, P. Paar and J. Rekitke:

Lenné3D – Walking through Landscape Plans

Cavens, D.:

Site-Specific Simulation and Visualization of Suburban Growth

Jude, S., I. Brown, S. Koukoulas, M. Dickson, M. Walkden, A. Jones and A. Watkinson:

Exploring Future Coastlines – Initial Steps Towards the Development of an Integrated Coastal Simulation and Visualisation System

Tiede, D. and T. Blaschke:

A Two-Way Workflow for Integrating CAD, 3D Visualization and Spatial Analysis in a GIS Environment

Coconu, L., C. Colditz, H.C. Hege and O. Deussen:

Seamless Integration of Stylized Renditions in Computer – Generated Landscape Visualization

Colditz, C., L. Coconu, O. Deussen and H.C. Hege:

Real-Time Rendering of Complex Photorealistic Landscapes Using Hybrid Level-of-Detail Approaches

Clasen, M. and H.C. Hege:

Realistic Illumination of Vegetation in Real-Time Environments

Buchholz, H., J. Bohnet and J. Döllner:

Smart Navigation Strategies for Virtual Landscapes

Döllner, J., K. Baumann and H. Buchholz:

Representation and Interactive Editing of Vector Data in Virtual Landscapes

van Lammeren, R., A. Momot, R. Olde Loohuis and T. Hoogerwerf:
3D Visualization of 2D Scenarios

Loiterton, D. and I. Bishop:
Virtual Environments and Location-Based Questioning for Understanding Visitor
Movement in Urban Parks and Gardens

Implications for the Planning Process

Warren-Kretzschmar, B. and S. Tiedtke:
What Role Does Visualization Play in Communication with Citizens? – A Field Study from
the Interactive Landscape Plan

Petschek, P.:
Terrain Modeling with GPS and Real-Time in Landscape Architecture

Schroth, O., E. Lange and W. Schmid:
From Information to Participation – Applying Interactive Features in Landscape
Visualizations

An, K.:
Implementation of Real-Time Landscape Visualisation for Planning Process

Golobic, M.:
Visualisation Methods as an Interface between Science and Democracy in Spatial Planning

Participation and Communication Techniques

Rekittke, J. and P. Paar:
Enlightenment Approaches for Digital Absolutism. Diplomatic Stepping-Stones Between
the Real and the Envisioned

Messenger Belveze, P. and D. Miller:
Visual Quality and Communication Information in a Rural Landscape Context

Wissen, U., E. Lange and W. Schmid:
Optimizing the Visualization of 3D-Information for Participative Planning of Landscape
Development Concepts

Appleton, K. and A. Lovett:
Display Methods for Real-Time Landscape Models: An Initial Comparison

Ecosystem and Land Use Modeling for Landscape Visualization

Röhricht, W.:

oik – nulla vita sine dispensatio. Vegetation Modelling for Landscape Planning

Pietsch, M. and E. Buhmann:

Interpreting the Bronze Age Sky Disc of Nebra using 3D GIS

Ross, L. and B. Kleinschmit:

A GIS-Based Approach to Real-Time Open Space Visualization

Visual Quality Modeling Using Virtual Environments

Mambretti, I., E. Lange and W. Schmid:

Using Visualization for the Evaluation of Safety and Aesthetics Conflicts in Urban Parks

Roth, M. and D. Gruehn:

Scenic Quality Modeling in Real and Virtual Environments

Baumann, H.:

Haydelberga – Integrated Real-Time Modelling and Visualisation

Wössner, U. and J. Kieferle:

Real-Time Simulation in Architectural Virtual Environments

Honjo, T., En-Mi Lim and Kiyoshi Umeki:

Real-Time Rendering of Landscapes Using VRML With Graphic User Interface

Game Engine-Based Landscape Visualization

Zeile, P., R. Schildwächter, T. Poesch and P. Wettels:

Production of Virtual 3D-Citymodels from Government Geo Data and Visualization with 3D Game Engines by the Example of the UNESCO World Heritage City of Bamberg

Stock, C., I. Bishop and A. O'Connor:

Generating Virtual Environments by Linking Spatial Data Processing with a Gaming Engine

Johns, R. and R. Lowe:

Unreal Editor as a Virtual Design Instrument in Landscape Architecture Studio

Kretzler, E.:

Real-Time in Landscape Architecture Competitions

Hands-on Workshop contribution

Ma, J. , ESRI:

Working towards a 3D GIS for Design Professionals in Landscape Architecture

Schliep, J. W. and S. McSherry, Xfrog:

Xfrog Organic Software Hands-on Workshop

Lemaistre, B. , Bionatics:

AMAP™ and Blueberry 3D Application Hands-on Workshop

Hildebrandt, M., 3D Geo:

LandXplorer Application Hands-on Workshop

Baumann, H. and J. Luethje:

Integrated Modeling and Visualization Workshop
